

Cloud Services

Industry-leading HPC and software for geoscience

INDUSTRY CHALLENGES

Efficiency

Streamline your operations and focus on your core business by letting industry experts manage your geoscience compute and storage needs.

Flexibility

Secure additional resources when you need them, to quickly scale-up your computing resources and avoid bottle-necks in your exploration and development programs.

Technology

Hardware and geoscience software undergo rapid and constant development. Keep up-to-date by using our continuously evolving platform.

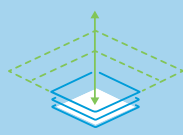

CGG CLOUD SERVICES AND SOLUTIONS

Fast & efficient

CGG Cloud Services

- Gain convenient access to powerful compute resources, optimized for seismic imaging and geoscience data and benefiting from continuous upgrades
- Utilize our **Geovation** seismic imaging software and application suite, used daily by our Subsurface Imaging experts, and well supported with a substantial ongoing R&D effort
- Grow your team capabilities with the help of our experts and learning resources
- Discover solutions tailored to your specific needs - from standalone HPC provision, to fully-managed processing and data management
- Connect, collaborate, manage and QC from around the globe via our robust and secure online portal. All you need is a browser.
